Universal, manual radial press for producing pipe pressing joints for all common pressfitting systems.
Pressing joints with plastic and multi-layer composite tubes Ø 10–26 mm Ø ⅜ – 1"

Complete range of REMS pressing tongs for all common pressfitting systems, see page 142–158.

REMS Eco-Press – universal up to Ø 26 mm.
Secure crimping in seconds.

System advantage
Only one type of pressing tongs for all REMS radial presses (except REMS Mini-Press ACC) and radial presses of other makes. All pressing tongs marked by a * have another connection (Patent EP 1 223 008, Patent US 6,739,172) and also fit the manual radial press REMS Eco-Press. Thus simple, inexpensive stocking.

Pressing tongs for all common systems
Complete assortment of REMS pressing tongs for all common pressfitting systems (page 142–158). High-compression pressing tongs in forged and specially hardened steel. Pressing contours of REMS pressing tongs are system-specific and correspond to the respective pressfitting system. Thus perfect system-conformity, safe press jointing.

Design
Compact, handy, light. Drive unit with short tubular arms only 1.6 kg. Works anywhere, free-hand, overhead, in confined areas. Secure seating of pressing tongs through locking pins. Dividable tubular arms for individual adjustment of leverage to accommodate different force demands of different pressfitting systems.

Pressing operation
A perfect joint is achieved when pressing tongs close completely. Final-lock-positioning, the pressing jaws remain in a closed position until opening. This way, the perfect pressing joint (completely closed pressing jaws) can be observed.
